

EXHIBIT 1

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 1**

Claim 1 of '686 Patent	Infringed: Literally and DOE
A monitoring device for monitoring a target, comprising:	<p>"VeriWise TRUCKING not only gives you precise location information on your trailers –more importantly, it keeps you informed of what's happening in and around your trucking assets, enabling you to manage exceptions and drive productivity in your fleet."</p> <p>"With VeriWise cellular- and satellite-based solutions, you'll know exactly where and when a trailer starts and stops, and if a door is opened en route. You'll know when a trailer is a pre-defined distance from a location or destination with advanced landmarking functionality." http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/index.html</p>
a microcontroller programmed for operating said monitoring device, said microcontroller having no port that allows access for reading programming of said microcontroller;	See Product Datasheet SG 100. Smith needs further information from GE to make a definitive determination on this element. Based on the information available, it appears that GE's controller does not have a port that allows access for reading its programming.
a wireless transceiver operable for communicating with a wireless network;	<p>"GSM/GPRS Cellular Network or Satellite (One or Two-way)" http://www.geassetintelligenceeu.com/technology/</p> <p>"GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors." http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at http://www.geassetintelligenceeu.com/technology/</p>
a modem for interfacing with said wireless transceiver for communicating over said wireless network;	<p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at</p>

	http://www.geassetintelligenceeu.com/technology/
a global positioning sensor;	<p>"Knowing where your assets are is important - in fact vital - to effectively managing your fleet. Adding a tracking solution to your fleet is the best way to arm yourself with the knowledge you need on a daily basis to keep your fleet fully utilized and profitable."</p> <p>See diagrams at http://www.geassetintelligenceeu.com/technology/</p> <p>And http://www.trailer-services.com/veriwise/how.html</p> <p>"GPS (global positioning system) satellites continuously transmit signals that can be interpreted by special devices to help determine location. To get an accurate location fix, the VeriWise tracking device collects signals from multiple GPS satellites. The location is calculated by the VeriWise device at the trailer and transmitted through the ORBCOMM low-earth orbit satellite and gateway earth station to a Network Control Center and ultimately to your computer system. The data is visible through the GE-Trailer Fleet Services Premier Services web interface or can be send directly to your computer system via XML data exchange." http://www.trailer-services.com/veriwise/how.html</p>
an interface between said monitoring device and said target for communicating signals relating to said target;	<p>See for example: Product Datasheet DG 100, "Technical Specifications" Sensors</p> <p>SATS 200, SATS 100, SC 200</p> <p>SGE describes its product as follows: "Over the air software upgradeable and configurable"</p> <p>http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>The product datasheets show a modem/transceiver interfacing with wireless sensors which can be configured to monitor a number of variables such as doors, brakes, mileage, temperature and locks. See also, http://www.geassetintelligenceeu.com/on-time/on-time-details/</p>
one or more inputs to said monitoring device from said target;	<p>See for example: Product Datasheet DG 100, "Technical Specifications" Sensors</p> <p>SATS 200, SATS 100, SC 200</p> <p>SGE describes its product as follows: "Over the air software upgradeable and configurable"</p>

	<p>http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>The product datasheets show a modem/transceiver interfacing with wireless sensors which can be configured to monitor a number of variables such as doors, brakes, mileage, temperature and locks. See also, http://www.geassetintelligenceeu.com/on-time/on-time-details/</p>
<p>and one or more outputs from said monitoring device to said target, said one or more inputs and said one or more outputs being individually selectable from a plurality of inputs to said target and a plurality of outputs from said monitoring device during installation of said monitoring device to said target such that each of said one or more inputs and each of said one or more outputs are identified as to their nature and stored in a database for each of a plurality of monitoring devices.</p>	<p>The GE VeriWise product includes a GE server as shown on GE's website. http://www.geassetintelligenceeu.com/technology/. The GE server may be accessed by the End User/GE customer via the GE Web Interface. This web interface allows the End User to access the monitored information. In order to enable the End User to access the monitored information, definition data must be entered into the database to define the variables being monitored and the targets being monitored for a particular customer.</p> <p>See for example: Product Datasheet DG 100, "Technical Specifications" Sensors</p> <p>SATS 200, SATS 100, SC 200</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 2

Claim 2 of '686 Patent	Infringed: Literally and DOE
The monitoring device of claim 1, wherein said target is a vehicle and said interface communicates electrical signals relating to one or more elements of said vehicle.	<p>“GE VeriWise™ is the "control centre" for your mobile asset. Whether you have a trailer, rail car or container, our telematics system provides remote monitoring and diagnostics of your assets and freight via a user web interface – tailor made to fit your business.”</p> <p>http://www.geassetintelligenceeu.com/</p> <p>See diagrams at http://www.geassetintelligenceeu.com/technology/</p> <p>And http://www.trailer-services.com/veriwise/how.html</p>

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 3**

Claim 3 of '686 Patent	Infringed: Literally and DOE
<p>A method for monitoring a plurality of targets, said plurality of targets having at least first and second variables to be monitored and having at least first and second items to be controlled, said first and second variables being selectively different for different of said plurality of targets, said first and second items to be controlled being selectively different for different of said plurality of targets, said method comprising:</p>	<p>“VeriWise TRUCKING not only gives you precise location information on your trailers – more importantly, it keeps you informed of what’s happening in and around your trucking assets, enabling you to manage exceptions and drive productivity in your fleet.”</p> <p>“With VeriWise cellular- and satellite-based solutions, you’ll know exactly where and when a trailer starts and stops, and if a door is opened en route. You’ll know when a trailer is a pre-defined distance from a location or destination with advanced landmarking functionality.” http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/index.html</p> <p>An example list of variables that can be monitored such as battery status, cargo, doors, locks, truck ID, brakes, etc .may be found on GE’s website. See, e.g., http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Other variables that may be monitored are Lights, A/EBS, Reefer DC/DC and associated ports or cables as shown in Product Datasheet SG 100.</p> <p>“GE VeriWise™ allows you to maintain control of your assets and freight, and make timely, well-informed decisions that can boost profits, improve business performance and set a new standard in your customer service. “ http://www.geassetintelligenceeu.com/</p> <p>Examples of items to be controlled are below.</p> <p>“Through GE’s official partnership with leading reefer manufacturers, <u>Carrier Transicold</u> and <u>Thermo King</u>, GE VeriWise™ has compatibility with current reefer equipment by the unique protocol integration between our modem and reefer controllers *.”</p>

	<p>http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Both Thermo King and Carrier also have designed their refrigeration units to allow for two-way communication. This feature allows a fleet manager to remotely control tasks such as starting the unit, selecting temperature set points or running diagnostic routines.”</p> <p>http://www.etrucker.com/apps/news/article.asp?id=60030</p> <p>“GE Launches Next Generation VeriWise Web Interface” “Security Features-Trailers can be locked down instantly,” http://rentge.com/news/NPTC%20-%20GE_VW-WebInterface.pdf</p> <p>“By using the GE Veriwise trailer-tracking system, the company places geofences around certain corridors of theft, such as Georgia, to alert dispatchers when loads enter the area. Tabor also uses geofencing to lock down trailers at any location where drivers have to stop.”</p> <p>http://www.etrucker.com/apps/news/article.asp?id=63749</p> <p>VeriWise also allows the customer to do over the air configuration, controlling the Module Schedule Configuration, Module Reefer Configuration.</p> <p>http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/cold_chain/index.html</p> <p>“For VeriWise customers, the newest features include the ability to remotely configure polling reports . . . , turn on emergency tracking . . . and define and grant access rights” “New Online Tools Speed Decision-making for VeriWise Customers” Press Release</p> <p>“Whether you have a trailer, rail car or container, our telematics system provides remote monitoring and diagnostics of your assets and freight via a user web interface – tailor made to fit your business.” http://www.geassetintelligenceeu.com/</p>
<p>attaching a transceiver with an antenna to each of said plurality of targets;</p>	<p>“GSM/GPRS Cellular Network or Satellite (One or Two-way)”</p> <p>http://www.geassetintelligenceeu.com/technology/</p> <p>“GE Asset Intelligence has released a new</p>

	<p>GPRS/GPS based modem technology with wireless sensors.” http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at http://www.geassetintelligenceeu.com/technology/</p>
<p>providing a configurable electrical interface with a plurality of ports for each of said plurality of targets for interfacing between said transceiver and said first and second variables to be monitored and said first and second items to be controlled;</p>	<p>See for example: Product Datasheet DG 100, “Technical Specifications” Sensors SATS 200, SATS 100, SC 200S</p> <p>GE describes its product as follows: “Over the air software upgradeable and configurable” http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>The product datasheets show a modem/transceiver interfacing with wireless sensors which can be configured to monitor a number of variables such as doors, brakes, mileage, temperature and locks. See also, http://www.geassetintelligenceeu.com/on-time/on-time-details/</p>
<p>entering definition data into a database to define said first and second variables whereby said definition data selectively varies between said plurality of targets, said definition data comprises a configuration of said plurality of ports which are selectively electrically connected with respect to said first and second variables to be monitored and said first and second items to be controlled, said definition for said configuration of said plurality of ports being selectively variable between said plurality of targets;</p>	<p>The GE VeriWise product includes a GE server as shown on GE’s website. http://www.geassetintelligenceeu.com/technology/. The GE server may be accessed by the End User/GE customer via the GE Web Interface. This web interface allows the End User to access the monitored information. In order to enable the End User to access the monitored information, definition data must be entered into the database to define the variables being monitored and the targets being monitored for a particular customer.</p> <p>“Through GE’s official partnership with leading reefer manufacturers, <u>Carrier Transicold</u> and <u>Thermo King</u>, GE VeriWise™ has compatibility with current reefer equipment by the unique protocol integration between our modem and reefer controllers *.” http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Both Thermo King and Carrier also have designed</p>

	<p>their refrigeration units to allow for two-way communication. This feature allows a fleet manager to remotely control tasks such as starting the unit, selecting temperature set points or running diagnostic routines.”</p> <p>http://www.etrucker.com/apps/news/article.asp?id=60030</p> <p>“GE Launches Next Generation VeriWise Web Interface” “Security Features-Trailers can be locked down instantly,”</p> <p>http://rentge.com/news/NPTC%20-%20GE_VW-WebInterface.pdf</p> <p>“By using the GE Veriwise trailer-tracking system, the company places geofences around certain corridors of theft, such as Georgia, to alert dispatchers when loads enter the area. Tabor also uses geofencing to lock down trailers at any location where drivers have to stop.”</p> <p>http://www.etrucker.com/apps/news/article.asp?id=63749</p>
receiving data through a wireless network from said transceiver, interpreting said received data based on said definition data in said database;	<p>See Diagram at</p> <p>http://www.geassetintelligenceeu.com/technology/</p>
connecting to said database through an Internet connection with a personal computer to receive said interpreted data;	<p>End User GE Web Interface</p> <p>http://www.geassetintelligenceeu.com/technology/</p> <p>“Information can be delivered through our user interface &/or by server based data transfer”</p> <p>http://www.geassetintelligenceeu.com/why-veriwise/</p> <p>?tx_ncleadme_pi1%5BqUId%5D=5&cHash=a75acf8908</p>
and sending control information from said personal computer through said Internet connection for transmission through said wireless network for selectively operating said first and second items to be controlled.	<p>“Through GE's official partnership with leading reefer manufacturers, Carrier Transicold and Thermo King, GE VeriWise™ has compatibility with current reefer equipment by the unique protocol integration between our modem and reefer controllers *.”</p> <p>http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Both Thermo King and Carrier also have designed</p>

	<p>their refrigeration units to allow for two-way communication. TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 14

Claim 14 of '686 Patent	Not Asserted
The method of claim 3, wherein:	
said target is a structure affixed to the Earth so as to be non-movable.	This claim is not presently asserted against GE. Based on the information available to Plaintiff Smith, it does not appear that GE's products provide this functionality; however, if evidence is discovered that shows that GE does provide this feature, Smith reserves the right to assert this claim.

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 15**

Claim 15 of '686 Patent	
<p>A monitoring system for monitoring a plurality of targets on behalf of a plurality of clients, each of said clients being associated with one or more of said plurality of targets, comprising:</p>	<p>"GE VeriWise™ is the "control centre" for your mobile asset. Whether you have a trailer, rail car or container, our telematics system provides remote monitoring and diagnostics of your assets and freight via a user web interface – tailor made to fit your business." http://www.geassetintelligenceeu.com/</p> <p>"Knowing where your assets are is important - in fact vital - to effectively managing your fleet. Adding a tracking solution to your fleet is the best way to arm yourself with the knowledge you need on a daily basis to keep your fleet fully utilized and profitable."</p> <p>See diagrams at http://www.geassetintelligenceeu.com/technology/ And http://www.trailer-services.com/veriwise/how.html</p> <p>"GPS (global positioning system) satellites continuously transmit signals that can be interpreted by special devices to help determine location. To get an accurate location fix, the VeriWise ♦ tracking device collects signals from multiple GPS satellites. The location is calculated by the VeriWise ♦ device at the trailer and transmitted through the ORBCOMM low-earth orbit satellite and gateway earth station to a Network Control Center and ultimately to your computer system. The data is visible through the GE-Trailer Fleet Services Premier Services web interface or can be send directly to your computer system via XML data exchange." http://www.trailer-services.com/veriwise/how.html</p>
<p>a computer network server operable for communicating with a plurality of client computers through an Internet connection;</p>	<p>The schematic diagram under the section "How it works" shows a GE server in connection with client computers through the Internet. "Using a remote monitoring device, satellite-based telecommunications, a series of sensors and established business rules, GE's VeriWise TRAILER technology gathers and provides information on the location of the fleet and the status of the cargo inside each trailer." See diagrams at http://www.geassetintelligenceeu.com/technology/ And http://www.trailer-services.com/veriwise/how.html</p> <p>"The VeriWise solution uses the most advanced and ubiquitous digital wireless network in North America, intelligently selecting from CDMA, 1XRTT, analog and wireless networks."</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 20

Claim 20 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 15, wherein:	
said database comprising a list of ingoing and outgoing messages.	See http://www.ge.com/equipmentservices/assetintelligence/resources/datasheets/downloads/VeriwiseC_CellFlatbed.pdf

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 21

Claim 21 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 15, further comprising:	
said plurality of wireless communication units including a modem for encoding said location information.	<p>GSM/GPRS Cellular Network or Satellite (One or Two-way)" <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>"GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors." <u>http://www.geassetintelligenceeu.com/new-product-launch/</u></p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>"With VeriWise cellular- and satellite-based solutions, you'll know exactly where and when a trailer starts and stops, and if a door is opened en route. You'll know when a trailer is a pre-defined</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 22

Claim 22 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 15, further comprising:	
at least a portion of said plurality of targets being a plurality of transport vessels, a wireless network system for communicating with said plurality of transport vessels, and said database being operable for storing vessel location information.	"VeriWise MARINE does more than give you location information on your container assets – it helps you reduce downtime, monitor and manage the environment in and around your containers, and increase the availability and reliability of your entire marine container fleet. On-demand data generated by real-time tracking and monitoring applications provide end-to-end visibility on your reefer containers and their cargo, helping you optimize marine transportation for your organization." http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/marine/index.html

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 23

Claim 23 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 15, further comprising:	
a two-way pager operable for contacting one or more of said plurality of wireless communication units through said wireless network.	http://www.geassetintelligenceeu.com/technology/ See depiction of "Alarm SMS"

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 24

Claim 24 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 15, further comprising:	
a microcontroller for operating said wireless communication unit, said microcontroller having a memory for programming said microcontroller for operating said wireless unit, said microcontroller comprising a computer and said memory within a single integrated circuit.	<p>“GSM/GPRS Cellular Network or Satellite (One or Two-way)” <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>“GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors.” <u>http://www.geassetintelligenceeu.com/new-product-launch/</u></p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>In order to more fully address this element, Plaintiff Smith will need to see the circuit designs for GE’s microcontrollers</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 25

Claim 25 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 24, wherein said microcontroller has no port that allows access for reading programming of said memory.	See Product Datasheet SG 100. Smith needs further information from GE to make a definitive determination on this element. Based on the information available, it appears that GE's controller does not have a port that allows access for reading its programming.

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 26

Claim 26 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 24, further comprising:	
said plurality of client computers are each operable for communicating with said computer network server relating to said electrical signals for said one or more of said plurality of targets with which said client is associated.	See diagrams at http://www.geassetintelligenceeu.com/technology/ And http://www.trailer-services.com/veriwise/how.html

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 27**

Claim 27 of '686 Patent	Not Asserted
The monitoring system of claim 26, further comprising:	This claim is not presently asserted against GE. Based on the information available to Plaintiff Smith, it does not appear that GE's products provide this functionality; however, if evidence is discovered that shows that GE does provide this feature, Smith reserves the right to assert this claim
at least a portion of said plurality of targets are vehicles,	
each vehicle having an electrical system connected to said target interface,	
said plurality of client computers being operable for sending an electrical signal to said electrical system of said vehicle through said target interface for said one or more of said plurality of targets with which said client is associated.	

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 28**

Claim 28 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 26, further comprising:	
at least a portion of said plurality of targets are vehicles,	<p>"VeriWise TRUCKING not only gives you precise location information on your trailers –more importantly, it keeps you informed of what's happening in and around your trucking assets, enabling you to manage exceptions and drive productivity in your fleet."</p> <p>"With VeriWise cellular- and satellite-based solutions, you'll know exactly where and when a trailer starts and stops, and if a door is opened en route. You'll know when a trailer is a pre-defined distance from a location or destination with advanced landmarking functionality." http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/index.html</p>
each vehicle having an electrical system connected to said target interface,	<p>"GSM/GPRS Cellular Network or Satellite (One or Two-way)" http://www.geassetintelligenceeu.com/technology/</p> <p>"GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors." http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p>
said plurality of client computers being operable for detecting an electrical signal from said vehicle through said target interface, said wireless network system, and said computer network server in accordance with a description for each said target interface stored within	<p>See diagram at http://www.geassetintelligenceeu.com/technology</p> <p>See for example: Product Datasheet DG 100, "Technical Specifications" Sensors</p> <p>SATS 200, SATS 100, SC 200S</p> <p>GE describes its product as follows: "Over the air software upgradeable and configurable" http://www.geassetintelligenceeu.com/new-product-</p>

<p>said database.</p>	<p><u>launch/</u> The product datasheets show a modem/transceiver interfacing with wireless sensors which can be configured to monitor a number of variables such as doors, brakes, mileage, temperature and locks. See also, http://www.geassetintelligenceeu.com/on-time/on-time-details/</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 30

Claim 30 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, wherein:	
said computer network server is operable for communicating with said plurality of client computers through an Internet connection.	See diagrams at http://www.geassetintelligenceeu.com/technology/ And http://www.trailer-services.com/veriwise/how.html

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 31

Claim 31 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
said plurality of client computers being operable for producing a map showing thereon a geographic picture of one or more of said plurality of targets.	See diagrams at http://www.geassetintelligenceeu.com/technology/ And http://www.trailer-services.com/veriwisewise/how.html See http://www.ge.com/equipmentservices/assetintelligence/resources/datasheets/downloads/VeriwiseC_CellFlatbed.pdf "Features" "Web-based Interface" "Current/Historical Maps" "Email/Pager Alerts" "Customizable Reports"

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 32

Claim 32 of '686 Patent	Infringed: Literally and DOE
<p>The monitoring system of claim 29, wherein said plurality of targets comprise a plurality of vehicles and said plurality of status outputs relate to a status for each vehicle, said status outputs being selectively different for each vehicle.</p>	<p>“VeriWise TRUCKING not only gives you precise location information on your trailers –more importantly, it keeps you informed of what’s happening in and around your trucking assets, enabling you to manage exceptions and drive productivity in your fleet.”</p> <p>“With VeriWise cellular- and satellite-based solutions, you’ll know exactly where and when a trailer starts and stops, and if a door is opened en route. You’ll know when a trailer is a pre-defined distance from a location or destination with advanced landmarking functionality.” http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/index.html</p> <p>An example list of variables that can be monitored such as battery status, cargo, doors, locks, truck ID, brakes, etc .may be found on GE’s website. See, e.g., http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Other variables that may be monitored are Lights, A/EBS, Reefer DC/DC and associated ports or cables as shown in Product Datasheet SG 100.</p> <p>“GE VeriWise™ allows you to maintain control of your assets and freight, and make timely, well-informed decisions that can boost profits, improve business performance and set a new standard in your customer service. “ http://www.geassetintelligenceeu.com/</p> <p>Examples of items to be controlled are below</p>

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 33**

Claim 33 of '686 Patent	Infringed: Literally and DOE
<p>The monitoring system of claim 32, wherein said plurality of targets comprise a plurality of vehicles and said plurality of control inputs relate to electrically controllable features for each vehicle, said control inputs being selectively different for each vehicle.</p>	<p>Examples of items to be controlled are below.</p> <p>"Through GE's official partnership with leading reefer manufacturers, <u>Carrier Transicold</u> and <u>Thermo King</u>, GE VeriWise™ has compatibility with current reefer equipment by the unique protocol integration between our modem and reefer controllers *.</p> <p>"http://www.geassetintelligenceeu.com/cold-chain/cold-chain-details/</p> <p>Both Thermo King and Carrier also have designed their refrigeration units to allow for two-way communication. This feature allows a fleet manager to remotely control tasks such as starting the unit, selecting temperature set points or running diagnostic routines." http://www.etrucker.com/apps/news/article.asp?id=60030</p> <p>"GE Launches Next Generation VeriWise Web Interface" "Security Features-Trailers can be locked down instantly," http://rentge.com/news/NPTC%20-%20GE_VW-WebInterface.pdf</p> <p>"By using the GE Veriwise trailer-tracking system, the company places geofences around certain corridors of theft, such as Georgia, to alert dispatchers when loads enter the area. Tabor also uses geofencing to lock down trailers at any location where drivers have to stop." http://www.etrucker.com/apps/news/article.asp?id=63749</p> <p>VeriWise also allows the customer to do over the air configuration, controlling the Module Schedule Configuration, Module Reefer Configuration. http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/cold_chain/index.html</p> <p>"For VeriWise customers, the newest features include the ability to remotely configure polling reports . . . , turn on emergency tracking . . . and define and grant access rights" "New Online Tools Speed Decision-making for VeriWise Customers" Press</p>

	<p>Release</p> <p>“Whether you have a trailer, rail car or container, our telematics system provides remote monitoring and diagnostics of your assets and freight via a user web interface – tailor made to fit your business.”</p> <p>http://www.geassetintelligenceeu.com/</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 34

Claim 34 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 33, wherein said plurality of wireless communication units further comprise:	
transmitter and receiver electronics for two-way communication with said wireless network system related to said plurality of inputs and said plurality of outputs and said location information.	<p>“GSM/GPRS Cellular Network or Satellite (One or Two-way)” http://www.geassetintelligenceeu.com/technology/</p> <p>“GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors.” http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at</p> <p>http://www.geassetintelligenceeu.com/technology/</p>

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 35**

Claim 35 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 34, wherein said plurality of wireless communication units further comprise:	
programmable electronics related to said plurality of said control inputs and said plurality of status outputs such that each wireless communication unit is operable for adaptation to selection for each vehicle of said plurality of control inputs and said plurality of status outputs.	<p>VeriWise also allows the customer to do over the air configuration, controlling the Module Schedule Configuration, Module Reefer Configuration. http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/trucking/cold_chain/index.html</p> <p>“For VeriWise customers, the newest features include the ability to remotely configure polling reports . . . , turn on emergency tracking . . . and define and grant access rights” “New Online Tools Speed Decision-making for VeriWise Customers” Press Release</p> <p>See diagrams at http://www.geassetintelligenceeu.com/technology/</p> <p>And http://www.trailer-services.com/veriwise/how.html</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 36

Claim 36 of '686 Patent	Not Asserted
The monitoring system of claim 35, wherein:	
a plurality of said vehicles comprises a door lock as a control input such that each of said plurality of client computers is operable for selectively controlling said door lock of said plurality of vehicles with which said client is associated.	This claim is not presently asserted against GE. Based on the information available to Plaintiff Smith, it does not appear that GE's products provide this functionality; however, if evidence is discovered that shows that GE does provide this feature, Smith reserves the right to assert this claim.

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 37

Claim 37 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 34, further comprising:	
said database being operable for storing information for each of said plurality of targets that includes definitions of control inputs and status outputs for a respective interface between each of said plurality of targets and each corresponding wireless communication unit.	<p>The GE VeriWise product includes a GE server as shown on GE's website. http://www.geassetintelligenceeu.com/technology/. The GE server may be accessed by the End User/GE customer via the GE Web Interface. This web interface allows the End User to access the monitored information. In order to enable the End User to access the monitored information, definition data must be entered into the database to define the variables being monitored and the targets being monitored for a particular customer.</p> <p>End User GE Web Interface http://www.geassetintelligenceeu.com/technology/ "Information can be delivered through our user interface &/or by server based data transfer" http://www.geassetintelligenceeu.com/why-veriwise/?tx_ncleadme_pi1%5BqUid%5D=5&cHash=a75acf8908</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 38

Claim 38 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 34, further comprising:	
said database being operable for containing a list of ingoing and outgoing messages.	See http://www.ge.com/equipmentservices/assetintelligence/resources/datasheets/downloads/VeriwiseC_CellFlatbed.pdf

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 39

Claim 39 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
said plurality of wireless communication units including a modem for encoding said location information.	<p>“GSM/GPRS Cellular Network or Satellite (One or Two-way)” <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>“GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors.” <u>http://www.geassetintelligenceeu.com/new-product-launch/</u></p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at <u>http://www.geassetintelligenceeu.com/technology/</u></p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 40

Claim 40 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
at least a portion of said plurality of targets being a plurality of transport vessels, said database being operable for storing vessel location information.	<p>VeriWise MARINE</p> <p>VeriWise MARINE does more than give you location information on your container assets – it helps you reduce downtime, monitor and manage the environment in and around your containers, and increase the availability and reliability of your entire marine container fleet. On-demand data generated by real-time tracking and monitoring applications provide end-to-end visibility on your reefer containers and their cargo, helping you optimize marine transportation for your organization.</p> <p>http://www.ge.com/equipmentservices/assetintelligence/solutions/segments/marine/index.html</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 41

Claim 41 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 40, further comprising:	
a target interface for each of said plurality of wireless communication units for communicating electrical signals to said wireless communication unit related to said plurality of transport vehicles.	<p>See for example: Product Datasheet DG 100, "Technical Specifications" Sensors</p> <p>SATS 200, SATS 100, SC 200S</p> <p>GE describes its product as follows: "Over the air software upgradeable and configurable"</p> <p>http://www.geassetintelligenceeu.com/new-product-launch/</p> <p>The product datasheets show a modem/transceiver interfacing with wireless sensors which can be configured to monitor a number of variables such as doors, brakes, mileage, temperature and locks. See also, http://www.geassetintelligenceeu.com/on-time/on-time-details/</p>

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 42

Claim 42 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
said plurality of client computers are each operable for communicating with said computer network server relating to said electrical signals for said one or more of said plurality of transport vehicles with which said client is associated.	End User GE Web Interface http://www.geassetintelligenceeu.com/technology/ "Information can be delivered through our user interface &/or by server based data transfer" http://www.geassetintelligenceeu.com/ why-veriwise/?tx_nclleadme_pi1%5BqUid%5D=5&cHash=a75acf8908

PATENT 6,611,686

INVENTOR: JOSEPH D. SMITH

PRIORITY DATE: FEBRUARY 9, 1999

TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD

CLAIM 43

Claim 43 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
a microcontroller for operating said wireless communication unit.	<p>“GSM/GPRS Cellular Network or Satellite (One or Two-way)” <u>http://www.geassetintelligenceeu.com/technology/</u></p> <p>“GE Asset Intelligence has released a new GPRS/GPS based modem technology with wireless sensors.” <u>http://www.geassetintelligenceeu.com/new-product-launch/</u></p> <p>See for example, Product Datasheet: DG 100 along with other modem data sheets</p> <p>See diagram at <u>http://www.geassetintelligenceeu.com/technology/</u></p>

PATENT 6,611,686**INVENTOR: JOSEPH D. SMITH****PRIORITY DATE: FEBRUARY 9, 1999****TRACKING CONTROL AND LOGISTICS SYSTEM AND METHOD****CLAIM 44**

Claim 44 of '686 Patent	Infringed: Literally and DOE
The monitoring system of claim 29, further comprising:	
at least a portion of said plurality of targets are vehicles,	<p>"VeriWise TRUCKING not only gives you precise location information on your trailers –more importantly, it keeps you informed of what's happening in and around your trucking assets, enabling you to manage exceptions and drive productivity in your fleet."</p> <p>"With VeriWise cellular- and satellite-based solutions, you'll know exactly where and when a trailer starts and stops, and if a door is opened en route.
